# CONTROLS

Play with light to achieve striking results. Vivid and intense or soft and subtle, the possibilities really are endless. Limitless control gives you maximum creativity.

A range of easy to install and use control equipment for dimming and scene setting.

- Contractor and user friendly operation
- High reliability by utilising tried technology

LC512 SS ■ Colourstyle 512 controller

A sophisticated controller and power supply for maximum control and flexibility including automatic set-up, sound-to-light, full DMX timing configuration, astronomical clock and control / diagnostics via the built-in web server. Will fit into double gang wall box (145 x 85mm).

Use in conjunction with the **CONGA** for stunning results. See page 136 - 137

LCPM WH □ Push to make switch

LC110 WH □ 1 - 10V Dimmer

## A range of energy saving sensors, ideal for commercial and leisure sectors.

- Built in lux sensor
- Dimming options available
- Ceiling mounted
- Automatically turn off lighting when not needed
- Save money with automatic corridor lighting

### PIR PRESENCE DETECTOR

Up to 7m detection range, 6 Amp switching

#### SBPIR-SW

PIR presence detector 6A switch with lux sensor and time delay

#### SBPIR-PA

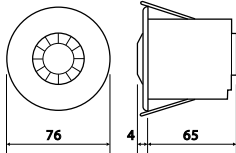

PIR presence / absence detector 10A switch with lux sensor and time delay also suitable for use with IR controller

#### SBPIR-ELDD

PIR presence / absence detector 10A DALI / DSI dimming with lux sensor and time delay, also suitable for use with IR controller

#### SBPIR-ELDA

PIR presence / absence detector 10A 1-10V dimming with lux sensor and time delay, also suitable for use with IR controller

### MICROWAVE PRESENCE DETECTOR

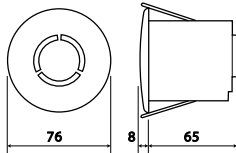

Up to 16m detection range, 10 Amp switching

#### SBMW-PA

Microwave presence / absence detector 10A switch with lux sensor and time delay, also suitable for use with IR controller

#### SBMW-ELDD

Microwave presence / absence detector 10A DALI / DSI dimming with lux sensor and time delay, also suitable for use with IR controller

### DIRECTIONAL MICROWAVE PRESENCE DETECTOR

Up to 30m detection range, 10 Amp switching

#### SBMWA-PA

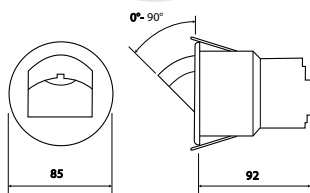

Adjustable microwave presence / absence detector 10A switch with lux sensor and time delay, also suitable for use with IR controller

#### SBMWA-ELDD

Adjustable Microwave presence / absence detector 10A DALI / DSI dimming with lux sensor and time delay, also suitable for use with IR controller

#### SBMWA-ELDA

Adjustable Microwave presence / absence detector 10A 1-10V dimming with lux sensor and time delay, also suitable for use with IR controller

### PROGRAMMER

#### MPDPROG

Programmer for presence / absence and dimmable detectors

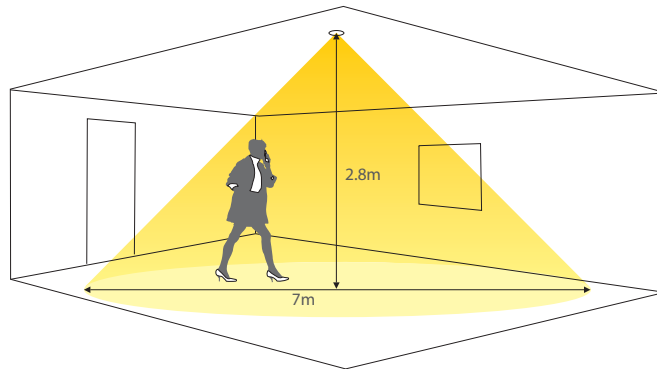

### INFRA RED CONTROLLER

#### IRCONT

infra red controller for on/off, lux up/down override

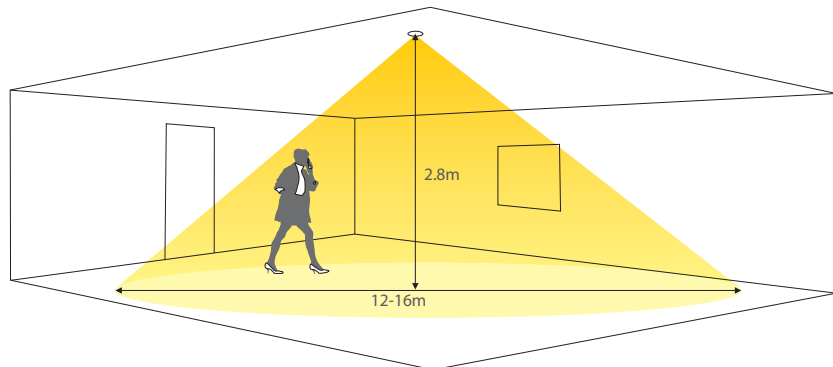

## PIR PRESENCE DETECTOR

Recessed PIR - sensitivity area

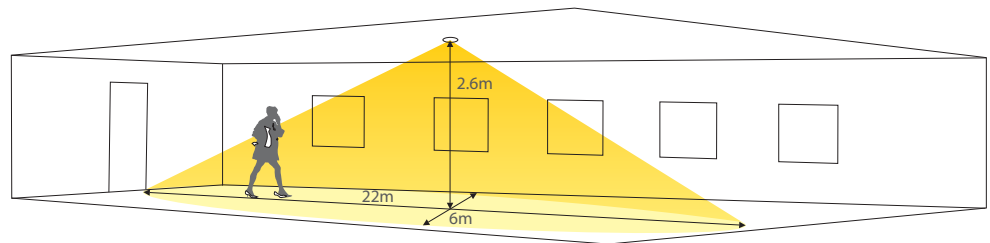

## MICROWAVE PRESENCE DETECTOR

Recessed microwave - sensitivity area

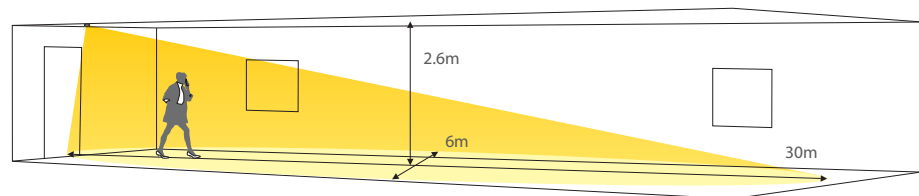

## DIRECTIONAL MICROWAVE PRESENCE DETECTOR

Angled microwave - sensitivity area - head set to 0° incline

Angled microwave - corridor sensitivity area - head set to 80° incline

Angled microwave - large room sensitivity area - head set to 80° incline
