

LED Sparkle interior and exterior

Introducing LED Sparkle, the new LED based interior and exterior decorative lighting system from Intralux. Creating vibrant or subtle lighting effects with minimal installation has never been so easy, economical or durable.

Available in four colours—red, blue, green and white—LED Sparkle creates perfect effects with a great range of beam angles ranging from 10° through to 180°. Non-imaging optics for higher lumen output when compared to conventional lenses. Highlight a specific architectural detail with the narrow beam or create a wash of colour with the wide angle beam.

AC/DC input voltage

LED Sparkle has a large range of exterior lighting applications. Boasting a heavy duty, durable, stainless steel body and an IP68 rating. LED Sparkle works perfectly submerged in fountains, mounted into walls or driveways, as wayfinding devices, stairway tread lighting and many more applications. It can also support the weight of a car* and protect itself against burn out with the unique function of thermal protection.

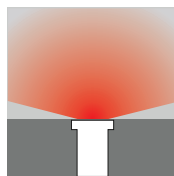

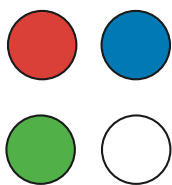

BULLET-PROOF reliability

The interior aluminium IP44 version is also available as a decorative pendant that looks and performs brilliantly when suspended from the ceiling. It can also be mounted seamlessly into walls and floors to create illuminated patterns at night. LED Sparkle is perfect for night clubs, hallway lighting and many other commercial and residential applications.

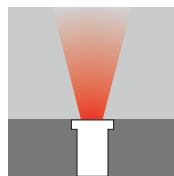

IP44 / IP68

1 watt Luxeon Illuminator

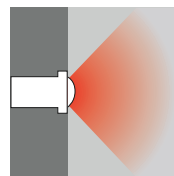

Installation is a breeze as the integral electronic control technology allows LED Sparkle to operate on 9-28 volt ac/dc input voltage, eliminating the need for specialised and expensive LED power supplies. Regular low cost transformers** can adequately provide the supply with the inbuilt electronics of LED Sparkle managing varying voltage and thermal control, ensuring extreme long product life. The 1 watt Luxeon Illuminator LED is extremely economical to run. LED Sparkle—the innovative, economical and long term solution for your next project.
